Subject: FW: DRAGONFLY + NOVARTIZAN // POA *** Class G Airspace ***

Carri, Colin, Dennis and Jason,

With respect to the upcoming NOVARTIZAN aerial (drone) assignment, scheduled for Tuesday, May 22nd 2018 please see the attached plan of activity docs and flight path.

This daytime operation will involve intermittent, **low altitude flights (SFC - 400FT AGL) in Class G airspace only.**

You can see from the US VFR sectional maps (attached below) that the agreed landing zone at 34.12ºN/118.31ºW is three tenths of a mile due south of Burbank's Class C veil, and 5.3NM from KBUR on a bearing of 144º. Class C airspace begins at 3000FT AGL at that location.

The Class C veil is indicated by the magenta arc due north of the agreed area of operation.

Our objective is to fly on a bearing of 057º NEE from the LZ at no more than two tenths of a mile range, maintaining a positive line of sight with the aircraft and avoiding all residential areas to the west.

Although close to the Burbank Class C, at no time will this operation come within one tenth of a mile of the Class C veil. The operation will commence at 5.3NM distance from KBUR and increase to 5.5NM once airborne.

In summary, this mission maintains and respects the parameters of both FAA Part 107 and the DRAGONFLY COA # FAA-2015-0424-333E;

1. Class G Airspace
2. SFC - 400FT AGL
3. >5NM from an airport with an operational CT.

You are welcome to contact me at 310.984.6670 with any questions.

Thank you,

LAUDER ROBINSON
